

5 KEYS TO PEACE OF MIND

AS YOU CONSIDER WHICH SECURITY COMPANY YOU'LL TRUST FOR YOUR PROTECTION, THERE ARE FIVE IMPORTANT QUESTIONS TO ASK ...

1

Does the company guarantee its response time?

2

Is the company locally owned and do they monitor your alarm from their own local monitoring station?

3

Does the company use the latest, most innovative technologies to protect you?

4

Do they design a custom security program for you or just offer a selection of standard packages?

5

How long has the sales person designing your system been in the alarm industry?
